

Laravel Relationship Step-by-Step Guide

1■■■ Model Setup

■■■■■■■■ ■■■■■■■■ ■■■■■ ■■■■■ Model ■■■■■ ■■■■■:

- 1 php artisan make:model Applicant -m
- 2 php artisan make:model Person -m
- 3 php artisan make:model File -m
- 4 php artisan make:model MedicalInfo -m
- 5 php artisan make:model Education -m
- 6 php artisan make:model EmergencyContact -m

2■■■ Relationship Define in Models

Applicant.php

```
-----  
public function persons() {  
    return $this->hasMany(Person::class);  
}  
  
public function files() {  
    return $this->hasMany(File::class);  
}  
  
public function medicalInfo() {  
    return $this->hasOne(MedicalInfo::class);  
}  
  
public function education() {  
    return $this->hasOne(Education::class);  
}  
  
public function emergencyContacts() {  
    return $this->hasMany(EmergencyContact::class);  
}
```

Person.php

```
-----  
public function applicant() {  
    return $this->belongsTo(Applicant::class);  
}  
  
public function files() {  
    return $this->hasMany(File::class);  
}
```

File.php
